today's world those same instincts stop us from succeeding in the environment in which we actually live a diverse world of abundant choices and almost limitless connections now evolutionary biologist dr rebecca heiss offers a new approach that harnesses the power of our instincts and redirects them to work for us rather than against us dr heiss reveals the science behind our self sabotaging behaviors then provides simple actionable techniques that can rebuild our instinctive minds both practical and inspiring instinct is a roadmap that anyone can use to finally stop living on autopilot improve productivity and happiness and consciously craft a better life an examination of clean technology entrepreneurship finds that green capitalism is more capitalist than green entrepreneurs and investors in the green economy have encouraged a vision of addressing climate change with new technologies in planetary improvement jesse goldstein examines the cleantech entrepreneurial community in order to understand the limitations of environmental transformation within a capitalist system reporting on a series of investment pitches by cleantech entrepreneurs in new york city goldstein describes investor friendly visions of incremental improvements to the industrial status quo that are hardly transformational he explores a new green spirit of capitalism a discourse of planetary improvement that aims to save the planet by looking for non disruptive disruptions technologies that deliver solutions without changing much of what causes the underlying problems in the first place goldstein charts the rise of business environmentalism over the last half of the twentieth century and examines cleantech's unspoken assumptions of continuing cheap and abundant energy recounting the sometimes conflicting motivations of cleantech entrepreneurs and investors he argues that the cleantech innovation ecosystem and its schumpeterian dynamic of creative destruction are built around attempts to control creativity by demanding that transformational aspirations give way to short term financial concerns as a result capitalist imperatives capture and stifle visions of sociotechnical possibility and transformation finally he calls for a green spirit that goes beyond capitalism in which sociotechnical

into topics including overcoming stage fright exploring personal speaking style creating the right talk for the right audience polishing presence and delivery and nailing any type of talk whether it s a lightning or long form talk or being part of a panel karen said even though poornima and i are professional speakers we felt it was important to share our own feelings of nerves and uncertainty and bumps we ve had along the way and sometimes continue to experience it was important for us to communicate that no one is perfect and it really is okay when talks don t always go according to plan our hope is that by being open we ll be able to give others the confidence and the techniques to handle situations when they arise deliver an amazing presentation and most importantly have fun this book explores how hobbes s political philosophy has occupied a pertinent place in different contexts and how his interpreters see their own images reflected in him or how they define themselves in contrast to him appropriating hobbes argues that there is no hobbes independent of the interpretations that arise from his appropriation in these various contexts and which serve to present him to the world there is no one perfect context that enables us to get at what hobbes really meant despite the numerous claims to the contrary he is almost indistinguishable from the context in which he is read this contention is justified with reference to hermeneutics and particularly the theories of gadamer koselleck and ricoeur contending that through a process of distancing hobbes s writings have been appropriated and commandeered to do service in divergent contexts such as philosophical idealism debates over the philosophical versus historical understanding of texts as well as in ideological disputations and emblematic characterisations of him by various disciplines such as law politics and international relations this volume illustrates the capacity of a text to take on the colouration of its surroundings by exploring and explicating the importance of contexts in reading and understanding how and why particular interpretations of hobbes have emerged such as those of carl schmitt and michael oakeshott or the international jurists of the seventeenth eighteenth and nineteenth centuries this
