Generative Second Language Acquisition 2020-09-24 an introduction to the key questions that drive the field of L2 acquisition research including its historical foundations
Second Language Acquisition 2017 most human beings grow up speaking more than one language a lot of us also acquire an additional language or languages other than our mother tongue this element in the second language acquisition series investigates the human capacity to learn additional languages later in life and introduces the seminal processes involved in this acquisition the authors discuss how to analyze learner data and what the findings tell us about language learning critically assessing a leading theory of how adults learn a second language generative SLA this theory describes both universal innate knowledge and individual experiences as crucial for language acquisition this element makes the relevant connections between first and second language

acquisition and explores whether they are fundamentally similar processes slabakova et al provide fascinating pedagogical questions that encourage students and teachers to reflect upon the experiences of second language learners

Key Topics in Second Language Acquisition 2014-04-02 this textbook offers an introductory overview of eight hotly debated topics in second language acquisition research it offers a glimpse of how sla researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to sla research each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study the reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology

the topics are treated independently so that they can be read in any order that interests the reader the topics in question are how different languages connect in the mind whether there is a best age for learning a second language the importance of grammar in acquiring and using a second language how the words of a second language are acquired how people learn to write in a second language how attitude and motivation help in learning a second language the usefulness of second language acquisition research for language teaching the goals of language teaching

Second-language Acquisition in Childhood 1978 the first volume in the cutting edge series cognitive science and second language acquisition this book provides a thorough overview of research on second language and bilingual speech production and proposes a new integrative model of how l2 speech is produced

Contemporary Approaches to Second Language Acquisition 2013 the first book length

treatment of its type ultimate attainment in second language acquisition is a case study with a solid theoretical grounding that examines the language of an immigrant learner of english and thereby presents a much needed understanding of the linguistic competence of second language speakers based on longitudinal data collected over a period of 16 years this clear and accessible presentation is well grounded in linguistic theory and in second language acquisition research issues author donna lardiere presents the narrative of patty an adult chinese immigrant learner of english who achieves native like proficiency in some areas of her english idiolect although reaches a plateau in her language acquisition known as the concept of fossilization by addressing this concept a central idea in second language acquisition research lardiere fills a void in existing literature individual chapters focus on patty s end state knowledge of grammatical areas of finiteness past tense

marking word order wh movement and relativization passivization number marking and use of determiners important topics discussed throughout the book include learner variability in production case study methodology the roles of motivation and prior language l1 knowledge and sensitivity to input in circumscribing ultimate attainment in adult second language acquisition ultimate attainment in second language acquisition is intended for anyone whose research is in the areas of second language acquisition language acquisition theoretical applied or developmental linguistics it is also appropriate for graduate level students of tesol and teachers who work with more advanced learners of foreign languages

Second Language

Acquisition 1997 this book offers a succinct theoretical introduction to the basic concepts in language testing in a way that is easy to understand in the japanese

context this book is highly recommended for university faculty members involved in obtaining assessment literacy teachers who want to validate their exploratory teaching and testing or applied linguistics students new to the language testing field the book is divided into four main sections the first provides an overview of the principles of language testing the next contains short extracts from the testing literature with questions which stimulate further thinking section 3 is a list of references with brief annotations and section 4 a glossary of referenced testing terms

Ultimate Attainment in Second Language Acquisition

2017-09-25 an up to date account of the main problems and theoretical and practical issues raised by second language acquisition research as such this introduction provides students with a real understanding of the fundamental topics in the field and the advances achieved by empirical research

Acquisition and Task-Based Language Teaching

2014-07-31 this handbook with 45 chapters written by the world s leading scholars in second language acquisition sla and language testing dives into the important interface between sla and language testing shared ground where researchers seek to measure second language performance to better understand how people learn their second languages the handbook also reviews how to best measure and evaluate the second language l2 learners personal characteristics backgrounds and learning contexts to better understand their l2 learning trajectories taking a transdisciplinary approach to research the book builds upon recent theorizing and measurement principles from the fields of applied linguistics cognitive science psychology psycholinguistics psychometrics educational measurement and social psychology the handbook is divided into six key sections 1 assessment concepts for sla

researchers 2 building instruments for sla research 3 measuring individual differences 4 measuring language development 5 testing specific populations and 6 measurement principles for sla researchers

Second Language

Acquisition 2005 this authoritative 2003 textbook provides an overview and analysis of current second language acquisition research conducted within the generative linguistic framework lydia white argues that second language acquisition is constrained by principles and parameters of universal grammar the book focuses on characterizing and explaining the underlying linguistic competence of second language learners in terms of these constraints theories as to the role of universal grammar and the extent of mother tongue influence are presented and discussed with particular consideration given to the nature of the interlanguage grammar at different points in

development from the initial state to ultimate attainment throughout the book hypotheses maintaining that second language grammars are constrained by universal principles are contrasted with claims that universal grammar is not implicated relevant empirical research is presented from both sides of the debate this textbook is essential reading for those studying second language acquisition from a linguistic perspective *Cognitive Linguistics, Second Language Acquisition, and Foreign Language Teaching* 2004-01-01 the routledge handbook of instructed second language acquisition is the first collection of state of the art papers pertaining to instructed second language acquisition isla written by 45 world renowned experts the entries are full length articles detailing pertinent issues with up to date references each chapter serves three purposes 1 provide a review of current literature and discussions of cutting edge issues 2 share the authors understanding of and

approaches to the issues and 3 provide direct links between research and practice in short based on the chapters in this handbook isla has attained a level of theoretical and methodological maturity that provides a solid foundation for future empirical and pedagogical discovery this handbook is the ideal resource for researchers graduate students upper level undergraduate students teachers and teacher educators who are interested in second language learning and teaching

how it is used in

communication the adoption and analysis of a specific model of acquisition the bottleneck hypothesis provides a unifying perspective the book assumes some non technical knowledge of linguistics but important concepts are clearly introduced and defined throughout making it a valuable resource not only for undergraduate and graduate students of linguistics but also for researchers in cognitive science and language teachers

infants and very young children develop almost miraculously the ability of speech without apparent effort without even being taught as opposed to the teenager or the adult struggling without it seems ever being able to reach the same level of proficiency as five year olds in their first language this useful textbook serves as a guide to different types of language acquisition monolingual and bilingual first language development and

child and adult second language acquisition unlike other books it systematically compares first and second language acquisition drawing on data from several languages research questions and findings from various subfields are helpfully summarized to show students how they are related and how they often complement each other the essential guide to studying first and second language acquisition it will be used on courses in linguistics modern languages and developmental psychology

Understanding Second Language Acquisition

1985-10-24 this collection of twelve papers demonstrates that the concepts developed within the cognitive linguistics movement afford an insightful perspective on several important areas of second language acquisition and pedagogy in the first part of the book three papers show how three cognitive linguistics constructs provide a useful theoretical frame within which second language acquisition

data can be analyzed first talmy's typology of motion events is argued to constitute the base relative to which acquisition discrepancies in motion events are most valuably investigated secondly the notion of construction is invoked in order to account for systematic differences between the native and non native speakers use of the english verb get finally frequency and similarity effects are shown to play a crucial part in the learning of prepositions in a second language the second part of the book shows that the key concepts commonly invoked in cognitive linguistics analyses allow language teachers to insightfully structure the presentation of problematic material in the foreign language classroom these concepts include among others polysemy the figure ground gestalt the usage based conception of grammar the radial organization of categories metaphors and cultural scripts the cognitive linguistics paradigm has already shown its viability to

analyze a wide array of linguistic phenomena this book establishes its relevance in the areas of second language acquisition and language pedagogy its intended public is composed of cognitive linguists second language acquisition specialists as well as foreign language pedagogy researchers instructors and students

Introduction to Instructed Second Language

Acquisition 2020 as one of the first books in child second language acquisition sla this book focuses on the core area of tense aspect morphology reporting on three l1 italian children learning l2 english vs three l1 english children learning l2 italian an innovative longitudinal bidirectional research design where two languages represent both source and target show effects of language transfer in learners that because of their age still have potential to become native speakers of the target an unusual feature of this book is that relevant studies of acquisition of l2 italian some

heretofore only in italian are reviewed incorporated into the study and made available to a more general audience though the main focus is on child sla crucial comparisons to both first language acquisition vs adult sla are presented this approach will thus be of interest more generally to readers in first and second language acquisition and child development

acquisition sla is a field of
inquiry that has increased in
importance since the 1960s
currently researchers adopt
multiple perspectives in the
analysis of learner language all
of them providing different but
complementary answers to the
understanding of oral and
written data produced by
young and older learners in
different settings the main goal
of this volume is to provide the
reader with updated reviews of
the major contemporary
approaches to sla the research
carried out within them and
wherever appropriate the
implications and or
applications for theory
research and pedagogy that
might derive from the available
empirical evidence the book is

intended for sla researchers as well as for graduate ma ph d students in sla research applied linguistics and linguistics as the different chapters will be a guide in their research within the approaches presented the volume will also be of interest to professionals from other fields interested in the sla process and the different explanations that have been put forward to account for it The Routledge Handbook of Second Language Acquisition and Language Testing 2020-12-28 in the 30 years since rod ellis first published the award winning understanding second language acquisition it has become a classic text this new fully updated edition continues to provide an authoritative and highly readable introduction to key areas of theory and research in second language acquisition ellis presents a comprehensive overview of the different theories in this field and examines critical reactions to them the book reflects recent trends in looking at

cognitive and social aspects of second language acquisition as well as examining the roles played by implicit and explicit instruction in language learning an excellent and much needed in depth review of the research on how children and literate adults learn a second language ellis provides a sound knowledge base for language teachers and beginning graduate students in applied linguistics focusing on relevant findings of research on second language learning by children and literate adults in both naturalistic and instructed contexts elaine tarone director of the center for advanced research on language acquisition university of minnesota additional online resources are available at oup.com/elt/teacher-understandingsla rod ellis is the distinguished professor of applied language studies in the school of cultures languages and linguistics in the university of auckland oxford applied linguistics series advisers anne burns and diane larsen freeman

Speech Production and Second Language

Acquisition 2006 the term
crosscurrent is defined as a
current flowing counter to
another this volume represents
crosscurrents in second
language acquisition and
linguistic theory in several
respects first although the
main currents running between
linguistics and second
language acquisition have
traditionally flowed from
theory to application equally
important contributions can be
made in the other direction as
well second although there is a
strong tendency in the field of
linguistics to see theorists
working within formal models
of syntax sla research can
contribute to linguistic theory
more broadly defined to
include various functional as
well as formal models of syntax
theories of phonology
variationist theories of

sociolinguists etc these
assumptions formed the basis
for a conference held at
stanford university during the
linguistic institute there in the
summer of 1987 the conference
was organized to update the
relation between second
language acquisition and
linguistic theory this book
contains a selection of mostly
revised and updated papers of
this conference and two newly
written papers

Second Language Acquisition Myths

2012-03-15 this volume was conceived as a first book in sla for advanced undergraduate or introductory master s courses that include education majors foreign language education majors and english majors it s also an excellent resource for practicing teachers both the research and pedagogy in this book are based on the newest research in the field of second language acquisition it is not the goal of this book to address every sla theory or teach research methodology it does however address the myths and questions that non specialist teacher candidates have about language learning steven brown is the co author of the introductory applied linguistics textbook understanding language structure interaction and variation textbook and workbook the myths challenged in this book are children learn languages quickly and easily while adults are ineffective in comparison a true bilingual is someone who

speaks two languages perfectly
you can acquire a language
simply through listening or
reading practice makes perfect
language students learn and
retain what they are taught
language learners always
benefit from correction
individual differences are a
major perhaps the major factor
in sla language acquisition is
the individual acquisition of
grammar

language english abstract this paper wants to examine the two processes of acquisition and learning compare them to find differences and possible similarities and try to find ways to make use of the processes by taking influence on them through intelligent teaching the field contains multiple approaches and positions among the different researchers within this paper i want to accentuate the two main notions of the research

one of them considers acquisition to be the only effective way to gain language knowledge the other argues for learning as representatives of the respective stream i want to highlight stephen krashen s research for the acquisition position and robert dekeyser and catherine j doughty on the learning side finally i want to try to derive a couple of possible implications from the research which could enhance second language teaching for the future
