Exploring Psychology 2003-04-01 this is a book i david secretly wanted to write i have long believed that what is wrong with all psychology textbooks including those i have written is their overlong chapters few can read a 40 page chapter in a single sitting without their eyes glazing and their mind wandering so why not organize the discipline into digestible chunks say forty 15 page chapters rather than fifteen 40 page chapters that a student could read in a sitting with a sense of completion thus when mcgraw hill psychology editor chris rogers first suggested that i abbreviate and restructure my 15 chapter 600 page social psychology into a series of crisply written 10 page modules i said eureka at last a publisher willing to break convention by packaging the material in a form ideally suited to students attention spans by presenting concepts and findings in smaller bites we also hoped not to overload students capacities to absorb new information and by keeping exploring social psychology slim we sought to enable instructors to supplement it with other reading
